Subject: SB 414 & 415

My name is Patricia Baxter and the subject of Autism is very near, dear, and important to me. My husband, both daughters, and a grandson are all within the Autism Spectrum. The lifelong medical and Mental health issues associated with Autism are difficult to deal with on a daily basis. Families need all of the help they can get, not just be told that "your insurance does not cover this." I urge you and the committee to take action on the bills 414 and 415 and vote them out of committee today.
